

Padlock

The PL Series solid brass padlock, featuring a US26D plated solid brass body for corrosion and bolt cutter resistance. The molybdenum shackle and blue bumper add strength and protection. Available in three sizes, it boasts an innovative shackle interchange design for easy replacement. Double locking ball bearings enhance security. Compatible with 6 or 7 pin SFIC cylinders, it offers versatile shackle diameters and heights for customized security needs.

Features & Benefits:

- Crafted with a US26D plated solid brass body
- Enhanced with a protective blue bumper
- Features an anti-cut molybdenum shackle that ensures superior resistance to tampering
